In the third eye (spiritual eye) these divine bodies are seen as avatar, deva, buddha, tao, angels who are the self, that is, by evolving the bodies reach the following stages:

Body becomes gold body or crystal body

The growth of spiritual wings on the body like an angel

The growth of many spiritual hands on the body such as Avatar, Deva, Buddha, Tao.

The growth of these divine bodies in the self is a benchmark that self-purification is on the right and effective path.

To be able to evolve the physical body, soul body, spirit body to become divine bodies requires tremendous energy. It takes decades or even a lifetime to be able to accumulate the tremendous energy that can evolve the body into a divine body. This immense energy is used to purify the physical body, soul body and spirit body. This energy burns all the impurities that exist in the self so that the body becomes pure, until it becomes a golden body or a crystal body and the growth of spiritual wings, spiritual hands, spiritual heads, and others.

The all-powerful energy that burns all the impurities that exist within the self will condense all the DNA strands in the physical body, soul body, spirit body until the DNA of the body is perfectly activated without limit and becomes Divine Crystal DNAs that emit Divine Powers.

This almighty energy also purifies all the chakras in the physical body, soul body, spirit body until these chakras develop at their highest level to be able to access the Divine Powers.

When a believer receives the outpouring of the Holy Spirit, and the Holy Spirit lives in that person's body, then that person is obliged to maintain and increase his holiness, purity, sainthood so that the Holy Spirit fire continues to burn brighter and brighter in his body.

A pure body will cause the Holy Spirit fire to be brighter and brighter and the self to experience the fullness of the Holy Spirit.

CHAPTER 3

HOW TO ACCESS THE Q-RAK DIVINE CULTIVATION

After obtaining the Q-RAK Divine Cultivation ability, what should be done?

A Q-RAK Divine Cultivation practitioner needs to maintain and improve the purification of the physical body, soul body and spirit body at all times of the day in the following ways:

- Perform mandatory daily affirmations for purification, protection, abundance, etc.
- Maintain action at all times from all things that give rise to a dirty aura.
- Perform cleansing, purification, and protection from dirty aura infections and evil attacks (spiritual warfare against dirty auras and evil creatures that destroy self-purification).

A Q-RAK Divine Cultivation practitioner has the ability to perform miraculous healing after obtaining Q-RAK Divine Cultivation Attunement. So Q-RAK Divine Cultivation practitioners can perform miracle healing for themselves, their families and others in need based on the Q-RAK Divine Cultivation Practitioner's Code of Ethics.

A Q-RAK Divine Cultivation practitioner has the ability to control, increase, multiply the fortune aura and fortune powers for the purposes of abundance and prosperity for the self, one's family and others. So use this ability for the purpose of abundant life for yourself, your family and others.

Most of the Q-RAK Divine Cultivation practitioners already have the ability of the third eye and conscience. By practicing it properly and safely, the intelligence of the Q-RAK Divine Cultivation practitioner's brain will increase drastically.

All abilities possessed by Q-RAK Divine Cultivation practitioners can basically help all problems faced in life in this world. With a positive mindset, creativity, love, and a positive spirit, Q-RAK Divine Cultivation is a miraculous, and powerful tool to live life in this world.

Anything that damages The Q-RAK's Divine Cultivation ability

The foundation of Q-RAK Divine Cultivation is the purification of the physical body, soul body and spirit body as well as self-efforts to always be filled with the Holy Spirit and the fire of the Holy Spirit is increasingly burning. So avoid doing things that destroy the purification of your physical body, soul body, spirit body of yourself and all things that dim the fire of the Holy Spirit and grieve the Holy Spirit.

When the purification of the physical body, soul body, and spirit body itself decreases, at that time the Q-RAK Divine Cultivation ability you have will decrease and the ability you have will recover if you increase your purification.

When the purification of the physical body, soul body, and spirit body decreases, at that time the Fire of the Holy Spirit dims, so that the Fire of the Holy Spirit is rekindled, immediately increase the purification of the physical body, soul body, and spirit body.

The things that cause a decrease in the purification of the physical body, the soul body, the spirit body of the self and the dimming of the Holy Spirit Fire is the infection of the dirty aura in the self which is caused by many things.

Here are things that cause dirty aura infection in yourself that must be avoided:

- Associated with jinn, khodam, demon, devil, satan
- Perform actions that trigger dirty aura
- Negative thinking (negative thought patterns)
- Saying words that produce dirty aura or invite dirty aura to come.
- Using the third eye and conscience in an unsafe way
- Using divine abilities and powers for negative purposes

How to access the Powers of Q-RAK Divine Cultivation?

After the practitioner gets the Q-RAK Divine Cultivation attunement. Practitioners can immediately use the Q-RAK Divine Cultivation ability to realize positive desires. To access the Q-RAK Divine Cultivation power is only by intending to access the power of God and then channeling it for the things that you want to manifest.

How to feel the Powers of Cultivation Divine Q-RAK?

The powers that flow can be felt by the body. The most sensitive part of the body to feel power is the palms. For this reason, use your palms to feel the presence of powers, especially after receiving attunement.

Here's how to feel the Powers,

- Shake both palms, then face each other your both palms and intend: I intend both palms to channel the best Q-RAK Powers into the space between my palms.
- Perform distribution in that position for 3 minutes and feel the sensation that occurs in both palms. If you can't feel it, please try to move your palms back and forth while feeling the sensation that occurs in both palms. To make your hands more sensitive, do the above procedure with your eyes closed, because closed eyes will increase the sensitivity of feeling.

You may feel:

- Tingling in the fingers
- Gentle pressure on the empty space between the palms
- Magnetic field between the palms
- Twitch in the middle of the palm
- Electrical vibrations between the fingers
- Blowing hot or cold air between the palms of the hands.

How do I see the Powers?

At the time of Q-RAK Divine Cultivation attunement, the practitioner's third eye ability has been opened to perfection. So after attunement the practitioner can use the third eye ability to see the existence of God's Power and the form of God's Power.

Here's how to see Power:

- Face each other's palms and intend: I intend my palms channel the best Power of Q-RAK Divine Cultivation into the space between my palms.
- Then slowly close both eyes and intend to see the best Power of Q-RAK Divine Cultivation flowing from the palms, see how the shape and color of the power is.
- Wait a few minutes, it will appear in the mind in the form of an image of the shape and color of the best Power of Q-RAK Divine Cultivation.
- Perform the above procedure with complete relaxation and deep calm, not in a hurry and also not forcing yourself, lest a feeling of stress arises. Don't think too hard, just intend to see the shape and color of the best Power of Q-RAK Divine Cultivation, do it like when you are sleeping or like when you are meditating.

You may see:

- The colors and forms of the ever-changing energy
- Moving or rotating energy
- Something dazzling light
- Electric current
- Items of power
- Power vortex
- Power wave
- Lightning flash
- And others

After you can feel or see the best Power of Q-RAK Divine Cultivation, you can use that power. For those who have not been able to feel or have not been able to see power, just believe that the power is there and flows then the power will flow.

How to Use the Powers of Q-RAK Divine Cultivation?

1. Using Affirmations
2. Using the Palm
3. Using Prayer

Using Affirmations

After the practitioner gets the attunement of Q-RAK Divine Cultivation, the practitioner can channel the Divine Powers by using affirmations, the method is simply to say affirmations for the desired goal.

Example:

Affirmations for healing:

Affirmation Method 1.

Say the affirmation: "I intend for 5 hours to use the Power of the flow of miraculous healing of the Presence of the Lord Jesus Christ to heal my body from all diseases, damage, destruction, abnormality until it is completely healed the highest caste."

So after the affirmation is complete, the Power of the flow of miraculous healing of the Presence of the Lord Jesus Christ will flow throughout the body to heal the body from all sickness, damage, destruction, abnormality until it is completely healed the highest caste. And the process takes place for 5 hours according to the confirmed energy distribution time.

Affirmations should be repeated 3 times so that the healing process occurs faster.

Affirmation Method 2.

The second way of affirmation is using the cultivation body. The cultivation body used can be: Avatar, Deva, Buddha, Tao, True Higher Self, True Spirit, and so on.

Here's how to do it:

Say the Affirmation: "I intend my True Spirit for 5 hours to use the Power of the flow of miraculous healing of the Presence of the Lord Jesus Christ to heal my body from all sickness, damage, destruction, abnormality until it is completely healed the highest caste."

So after finishing the affirmation, the True Spirit automatically for 5 hours will use the Power of the flow of miraculous healing of the Presence of the Lord Jesus Christ to heal the body from all sickness, damage, destruction, abnormality until it is completely healed the highest caste.

Using the Palm

The most common distribution of power is by using the palm. Intend to use your palms to channel power on the target. The target here can be the body of yourself or another person, can be objects and can also be plants or animals. Distribution can be done in 2 ways:

1. Directly touching the object or target for several minutes without moving or shifting the palm of the hand, after which the palm can be shifted on another target.
2. Distribution can also be done through remote means. The way is to point your palm at the target (photo, email address, cellphone number) because the target is in a different city from the practitioner. Just point your palm at the target (photo, email address, cellphone number) with the intention like this: I intend that my palms will channel power....to... (state the target).in the city...(where the target is located).

Examples for self-therapy:

Point the palm towards the target / to the position where the power will be distributed, the palm can be affixed to the body part or simply directed without touching that body part. When the palms are directed to that body part, say the affirmation: "The power of the flow of miraculous healing of the Presence of the Lord Jesus Christ flows from the palms of my hands throughout my body to heal my body from all sickness, damage, destruction, abnormality until it is completely healed the highest caste". Hold the palm for 10 minutes until the time it takes is enough.

Using Prayer

The position of the hands can be directed to the sick body part, pray as follows: "O Lord Jesus Christ, heal my whole body from all sickness, damage, destruction, abnormality until it is completely healed the highest caste. In the Name of the Lord Jesus Christ, right now I am completely healed." Repeat prayer 3 times

Sending Therapy remotely

For patients/targets who are far from the practitioner, the transfer of power is only intended to be like this:

I intend to send power.... to ... (target) in (city/destination)

For(state the purpose) for....(state the time for sending the power).

Channeling therapy to multiple targets at once/mass healing

For example, if a practitioner wants to be able to send power to 5 people from different places of residence, then the practitioner can send power to 5 people at the same time.

The method:

1. Write the names and addresses of the 5 people on a piece of paper
2. Then intend: I intend to send power to all people whose names and addresses are written on this paper. Then automatically power..... will be sent to the 5 people at once.

Are There Any Side Effects of Using Q-RAK Divine Cultivation in Healing Therapy?

Q-RAK Divine Cultivation Power is very safe to use on the body, including vital organs in the body. In the baby's body or fetus, the Q-RAK Divine Cultivation is able to work effectively to repair all damage to DNA and organs in the fetus and baby without the slightest side effects. CHAPTER 4

THERAPY METHODS

One of the Q-RAK Divine Cultivation ability is curing serious illnesses suffered by practitioners or others. For this reason, Q-RAK practitioners must understand the things needed to do therapy for themselves and others.

The following are things to consider during therapy:

1. Pray.

Pray In the Name of the Lord Jesus Christ that the Lord Jesus Christ will perform wonders and miracles.

2. Belief in the Omnipotence of the Miracles of the Lord Jesus Christ

High belief in the Omnipotence of the Miracles of the Lord Jesus Christ is needed by practitioners so that the flowing God's Powers become powerful without being hindered by the practitioner's subconscious. Practitioners' high belief will lead to high harmony in the Lord Jesus Christ so that the power of God that can flow is very powerful and miraculous.

3. In tune

Practitioners can in tune with the Lord Jesus Christ so that the flowing Powers of God can be even more powerful and miraculous. In tune can be done by doing the highest Caste Love meditation.

4. Body stamina

- Stamina your own body

Before doing therapy on patients, you should first increase your own body stamina, this is done so that the self-protection system becomes very strong so that healing in patients can run smoothly and safely and the healing process in patients can run smoothly because strong self-stamina will make the energy flows tremendously in the patient. In addition, the increase in body stamina can automatically ward off attacks by the dirty aura and the patient's viciousness.

- Patient's stamina

During therapy do increase the patient's stamina continuously. This will speed up the healing process for the patient. Often the healing process becomes very slow because the patient's stamina is very weak. Any powerful healing power will not be of much use if the patient's stamina is too weak.

5. Protection

- Protect yourself

Self-protection needs to be done before giving therapy to the patient. This is intended to prevent yourself from being attacked by a dirty aura and the patient's viciousness which causes the patient to experience illness. Without self-protection, it will have a dangerous impact on your purification, namely the self being infected with dirty aura attacks and the patient's viciousness which can cause kundalini leakage in

yourself, besides that it will also lead to other negative impacts if the self is filled with the patient's dirty aura.

- Patient protection

Patient protection is very necessary before therapy is carried out because often attacks of dirty aura and viciousness in the environment can damage the patient's therapy process. Protection for the patient will also have the effect of increasing the patient's stamina and also speeding up the healing process in the patient. The patient protection can also stem the attack of the dirty aura and viciousness of people who try to make the patient sick.

6. The duration of power distribution

The length of the power distribution also determines the speed of the patient's recovery. Distribution of power that is carried out for a minimum of 5 hours and is carried out 3 times a day will speed up the patient's recovery. The channeling of power for 5 hours can be done if you use your cultivation body by using intentions only on the affirmations made on the cultivation body, then the cultivation body will flow power for 5 hours without yourself doing a power distribution position.

7. Exterminating the viciousness and dirty aura

Often illnesses are caused by attacks of viciousness or dirty aura. Attacks of viciousness and dirty aura will damage immunity, destroy stamina and body protection, damage the chakra system and disrupt body systems, at an advanced level attack of viciousness and dirty aura can cause serious illnesses.

Viciousness and dirty aura can come from the self and can also come from the environment.

- Viciousness and dirty aura on the self

If you do not exercise self-control, you are easily carried away by lust, ego, anger, and often do negative things, it will stimulate the growth of viciousness and a dirty aura in yourself and in the long run will cause illness and disease in yourself.

- Viciousness and dirty aura in the environment

The viciousness and the dirty aura of the environment can come from the closest people, relatives, friends, or other people who are not known. Meanwhile, dirty aura can also come from objects that you own, from plants with dirty aura, animals with dirty aura, dirty houses, dirty smelling offices, streets, forests, gardens, markets, hospitals and many other sources of dirty aura in the environment.

8. Exterminate the cause of the disease in detail

In order for the disease to be destroyed quickly and completely, destroying the cause of the disease in detail down to the roots and seeds is very necessary. Knowledge of the causes of illness is very helpful for practitioners to quickly heal patients.

9. Heals wounds and organ damage

Healing wounds and organ damage in detail is also very necessary to speed up the patient's recovery.

10. Healthy Lifestyle

Patients should be asked to lead a healthy lifestyle by:

- Avoid foods that can trigger the pain experienced
- Get enough rest
- Sufficient exercise
- Control your mindset so you don't get stressed easily

11. Therapy Room

The therapy room is very supportive of the patient's therapy process. Before doing therapy, first clean the therapy room from the existing dirty aura and also protect the therapy room from attacks of viciousness and dirty aura of the environment that interfere with the therapy process.

12. Spiritual Music

Spiritual music really help speed up healing, help purify and increase the Presence of the Lord Jesus Christ which will speed up the miracle healing process. When therapy is done, you can play spiritual music.

13. Stem Cells

Stem cells are the stability of cells and as the center and axis of stability in existing cells. Stem cells have the function to:

- Build new body cells to replace body cells that have been damaged.
- Build new body tissues to repair damaged body tissues and organs.
- Increase endurance, healing disease.
- Stem cells can be cultured by using God's Power on the desired body part.

Code of Ethics in Healing

The code of ethics in healing aims to enable practitioners to provide the best for patients as well as to prevent negative things happening during the therapy process. This code of ethics should be implemented by all Q-RAK practitioners when going to a healing session.

1. Get the patient's consent in curing.

Before undertaking any healing therapy, the practitioner should seek the patient's consent. It is important to maintain courtesy and respect for the patient.

2. Not taking advantage of the situation.

When channeling power, especially by direct touch, practitioners are not justified in taking advantage of the situation for their own benefit which is very detrimental to the patient. For conditions of distribution of power to sensitive body parts that can lead to acts of sexual harassment, it is better if the position of distribution of power can be given indirectly. For example, by not placing the palm or touching directly on these parts, but only by channeling power from a distance of about 5 cm from these parts. The results of

the distribution of power in this position remain the same. Usually the practitioner will be more sensitive to the power if the distribution is done without touching the body directly.

3. Pray

Before doing healing, practitioners pray first to the Lord Jesus Christ to ask for protection and healing assistance so that the healing process can take place safely and perfectly. When practitioners pray to ask the Lord Jesus Christ for help to help the patient's healing process, often the Lord Jesus Christ is present in the form of the Presence of the Lord Jesus Christ and transmits God's power to the patient through the practitioner's body.

1. Pray

Both you and the patient pray so that you and the patient are given protection and help by the Lord Jesus Christ so that the therapy process can run smoothly and get perfect results.

2. Hold the Patient's Forehead

Next, hold the patient's crown using both palms gently, without causing a gripping feeling to the patient's head and then intend the following affirmations:

I intend both palms to channel the Power of the flow of miraculous healing of God the Presence of the Lord Jesus Christ throughout the patient's body to destroy all causes of illness (mention the illness experienced by the patient) and to heal all wounds and damage to the patient's organs and body tissues due to his illness ". Let the palms remain on the patient's head until the healing therapy process ends. So that both hands do not get tired, then look for a sitting or standing position in yourself that is most comfortable and not tiring.

3. Protect the patient

Example: do the affirmation, "I intend for 5 hours to use the power of the Holy Cross of God in the Presence of the Lord Jesus Christ to create a high-level protection system for this patient from attacks by viciousness and dirty aura of the environment that endangers the patient and causes illness in the patient".

patient due to the attack....(mention the illness experienced) until it is completely healed". Repeat the affirmation 3 times.

8. Increase body stamina

Increase your stamina again by doing affirmations of increasing stamina up to 3 times to speed up the healing process.

Causes of disease

Diseases in the body are caused by many factors such as the following:

1. Chakra system disorders

Disruption of the chakra system will affect the aura, the function of the glands in the body, the function of the body's organs, the circulatory system, and the body's metabolic system. Chakra which is the entrance and exit of energy, especially vital energy (life force) if disturbed or obstructed will cause energy supply, energy metabolism processes, and energy expenditure processes in the body and organs of the body will be disrupted, causing disturbances in the physical body that manifests itself be a physical illness.

2. Genetic damage and mutation

Genetic damage and mutations are caused by many factors. Lifestyle and bad environment also accelerate genetic damage and mutation.

3. Heredity (genetic)

Hereditary genetics is often the cause of disease. Low genetic quality or low levels of genetic diversity will have an impact on poor immunity and less perfect body growth.

4. Virus attack, bacteria, germs, fungi

As long as the immune system is strong, attacks by viruses, bacteria, germs and fungi will not cause disease in the body, but when the immune system decreases, attacks by viruses, bacteria, germs and fungi will cause illness.

5. Radiation

Carcinogenic radiation substances can trigger cancer attacks and other diseases.

6. Allergies

Allergies can cause discomfort in the body, in severe allergic conditions can cause illnesses such as asthma, cough, flu, fever, itching. Even allergies can cause death if the body's reaction causes body function failure and organ destruction.

7. Thick blood

Blood that is too thick will endanger health, can cause strokes, heart disease, and others.

8. Nervous tension

Nervous tension is caused by weak nervous stamina. The effects of nervous tension are joint pain, bleeding in the gums, easy colds, easy stress, difficult to focus, psychosomatic.

10. Trauma

Accidents or disasters can disturb the subconscious and cause psychological illness and ultimately cause physical illness.

11. Negative emotions

Often harboring negative emotions can trigger the growth of a dirty aura and viciousness so that the impact is an attack of the dirty aura and viciousness of the self that causes illness.

12. Lack of exercise

If the body lacks exercise, many body systems will be disturbed, especially in the muscular system, circulatory system, obesity, bad mood, and others.

13. Food

CHAPTER 5

AFFIRMATIONS

Affirmation is a form of self-confirmation, also a form of self-instruction on the other forms of self-consciousness in spiritual dimensions.

Within humans, there are 3 forms of awareness:

1. Physical awareness
2. Sub-conscious awareness
3. Super conscious awareness

Based on the 3 forms of awareness, affirmations are self-confirmation on the physical awareness, sub-conscious awareness or super conscious awareness. In general, affirmations are known as the form of verbal suggestion.

Is affirmation the same as prayer?

Affirmation is not the same as prayer. Affirmations is a form of self-confirmation and also a means of communication between the self and all of the forms of self-awareness, while prayer is a form of communication between the self and God the Creator.

The benefits of affirmation

Since humans consist of three forms of awareness with different dimensions and functions, ways of controlling each form of awareness are highly needed. Humans' abilities to control all forms of awareness will help them to achieve success in their life. Humans can find solution to all of their problems, if they can communicate with all forms of awareness they have.

The benefits of affirmation are as follow:

1. Changing negative sub-consciousness into positive
2. Healing sub-conscious trauma
3. Controlling sub-consciousness to achieve various objectives
4. Obtaining important information needed by the self by accessing super conscious awareness' storehouse of knowledge.
5. Super conscious awareness is the storehouse of knowledge at the cosmic level.
6. Obtain super powers from sub-conscious awareness and super conscious awareness.

The factors that make affirmation become tremendous and miraculous

In order to make the miraculous affirmations, the aspects needed are as follows:

1. Self-Confidence

A strong self-confidence is needed to ensure the wishes are achieved completely. If we are in a hesitation, affirmations are often ineffective and lose their tremendous power.

2. Persistence

Persistence in doing affirmation is highly needed until the actualization of the wishes in the physical realm happens.

All actualization of wishes in the physical realm need sufficient time, process and energy. Without persistence, the process of achieving wishes will be lack of sufficient energy to achieve the wishes into the physical realm.

3. The opening of tongue chakra

Tongue chakra is the chakra located below the tongue. The shape is like a small jasmine. Tongue chakra is only opened when the core of violet holy fire of God reaches the ultimate of unification in crown chakra. The opening of tongue chakra make every words we say being so miraculous.

4. The Flame of Self Purification Spirit

The Flame of Self Purification Spirit is a holy yellow light that shines and fluorescent above the head of someone whose tongue chakra has been opened. In general, the holy yellow light is called halo on holy man.

5. The core of violet holy fire of God unified in crown chakra

The development of violet holy fire of God reaches the level of the unification of the core of violet holy fire of God in crown chakra.

6. Cultivation bodies

Cultivation body is the formed of cultivation bodies of Avatar, Deva, Buddha, Tao, True Higher Self, True Spirit, so forth. If we are just an ordinary human who does not have the violet holy fire of God development and self-purification, and only have limited power, then the affirmation conducted will also have limit to bring any wishes into reality.

A great aim will need a big spiritual power to realize it. This is the importance of self-purification. Only with self-purification, the subconscious awareness and super conscious awareness in ourselves will have unlimited spiritual power and even will become miraculous power if the self-purification reaches the high level of purification.

The greater the aims, the higher spiritual power are needed and it takes longer to be realized. By the miraculous power, the aims will be reached by miraculous process.

How to make an effective and perfect affirmation?

The method is making a clear and detail affirmation. The clearer and more detail the affirmation is, the faster and easier the wishes realization will be.

The clear and detail affirmations may consist of the following:

1. What cultivation bodies are used?

- Avatar
- Deva
- Buddha
- Tao
- The self
- Spirit
- True Higher Self
- True Spirit

2. What power is used?

An example of using the Power of Bravana with its various forms

- REVA BRAVANA Power
- REVA BRAVANA Power Ball
- REVA BRAVANA Power Chrystal
- REVA BRAVANA Power of Life Flower
- REVA BRAVANA Power laser
- REVA BRAVANA Power Bomb
- REVA BRAVANA Power sword

3. What is the purpose desired?

- Making shield/protection
- Eliminating viciousness and negative aura
- Exterminating HIV viruses
- Growing the stem cells in liver
- Melting fats of stomach
- Increasing luck

- And so forth

4. Who are the targets of affirmation?

- The self
- Patients
- Objects
- Houses
- Offices
- Environment
- Projects
- So forth

5. How complete is the purpose?

- Perfect
- Permanent
- Absolute
- Infinite
- Incomparable
- and others

6. How long does the affirmation take place?

- 3 hours
- 5 hours
- 12 hours
- 24 hours
- Permanent

Here are the following examples of making a clear and detail affirmation:

Making Self-Protection

'I intend my True Spirit uses the power of the BRAVANA of the Presence of the Lord Jesus Christ to make a high level of protection system on myself against the attacks of human race and earth's viciousness and negative aura, which harm myself until reaching the ultimate of high level protection, do it for 5 hours.'

In many cases, affirmations conducted are not working maximally and often powerless. Why is so?

There are things that constraint an affirmation:

1. The attacks of viciousness and negative aura

Viciousness and negative aura becomes the main obstacle of the spiritual power within ourselves. Oftenly, the attacks of viciousness and negative aura damage and destroy the purification we conduct. Any damages and leaks will happen on violet holy fire of God and also on cultivation bodies. And in the end, all cultivation powers that we have are destroyed. When this condition happens, all affirmations will not have sufficient power to actualize all positive wishes.

2. Lack of Persistence

To realize all positive wishes need process to realize. The bigger the wishes intended, the higher power is needed and the longer time is needed to realize, because the condition of the self also determine the acceleration of the intended affirmations.

The power of affirmations have controlling influence in making changes of spiritual dimension and often this changes remains in at most two days.

Meanwhile, achieving positive wishes takes more than 2 days and even months. Thus, do the affirmations regularly and continuously until the wishes intended bring into reality without any obstacles.

3. Negative wishes

Purifying cultivation basically is for purification so that it can evolve our spirituality until reaching the high level of awareness. The pure high level of awareness will not make negative wishes come true. If negative wishes are affirmed, this will cause the growth of negative auras and viciousness within ourselves. This condition will destroy the purification within as well as destroy the purifying cultivation bodies that we already have.

4. Exaggerated wishes

Someone often do affirmations to achieve exaggerated wishes that are beyond the abilities he or she has currently, basically, all positive wishes will be realized by the high level of awareness owned.

However, realizing wishes takes time and process in accordance with the condition of ourselves. Often big wishes take very long time to be come true, it takes from months and even years. Just imagine, won't it needs a very high level of patience to wait for the wishes to be realized?

Won't the belief be destroyed by the long waiting? Won't perseverance will be dampened because of the

desperation starts to erode the spirit and self-confidence? That is the reason why the affirmation should be adjusted to the current condition and capabilities.

5. Depleted stamina

In doing affirmation to achieve wishes, it takes sufficient stamina so that the power of affirmation and self- protection remain stable. Without sufficient stamina, the affirmations are like losing their powers and the self-protection will be dwindling, which can put the self in danger as the self will be target of the environment's viciousness and negative aura.

6. Dimming violet holy fire of God

Violet holy fire of God is the foundation of purification. Dimming violet holy fire of God will destroy the purification and automatically destroy the cultivation powers owned. Without tremendous power, it will be difficult to actualize any positive wishes.

7. Self-hesitation

Strong belief is needed to achieve positive wishes. When we have high level of belief, we will automatically aligned with the highest awareness and capable of accessing the power of the highest awareness without any resistance. High level of belief will strengthen the high level of protection against the attacks of viciousness and negative aura. Meanwhile, hesitation will undermine the protection, opening slit for viciousness and dirty auras to enter and frustrate the process of achieving the wishes and damaging the spirit to be persistence in affirmation. This condition will also affect the self as we cannot align with the highest awareness that is the carrier of own miracles to achieve all positive wishes that we intended through conducted affirmation.

How many times affirmation is conducted in each session and in a day?

In relation to the perseverance to conduct affirmation, the best thing to do is that affirmation is conducted at least three times in each session and the number can be higher if the stamina is sufficient. If the stamina is depleted because of doing too much affirmation, this condition can endanger the physical health and also weaken the protection of the self. Do affirmation with full perseverance but please pay attention to the stamina, do not let the stamina depleted. If it is not possible to do affirmation 3 times, it can be done twice a day.

How about if the affirmation conducted is halted?

On any condition, self-persistence is highly needed to achieve wishes through affirmation. The working power of affirmations is only effective in influencing spiritual dimension for only 2 days. Thus, avoid not doing affirmation for more than 2 days.

Can affirmation be cancelled?

Sometimes, when stamina is depleted, we often finds difficulties in focusing on doing affirmations and this condition leads to mistakes in affirmation. The mistakes in affirmations can be cancelled by intending cultivation bodies to cancel them. For example: "I intend that my highest awareness to cancel ... affirmation (mention the affirmation conducted earlier).

Can affirmation be programmed?

Very busy practitioners often find difficulties in allocating time for conducting affirmation. Affirmation actually can be done anytime and anywhere. Basically, affirmation can be programmed. However, as day passes, the effectiveness of affirmation programming will be lessened and in long term the affirmation programming which has been done will not be effective anymore.

How to program affirmation?

In order to program affirmations, we can introduce the affirmations to the highest awareness and give name to the affirmation so that every time we want the highest awareness to achieve the affirmation, we only need to mention the name of the affirmation program.

When are the best times to conduct affirmation?

Affirmation can be conducted anytime but there are the best times to conduct affirmation, namely the violet holy fire of God hours. At the violet holy fire of God hours, cultivation bodies experience the surge of cultivation power so that they have very tremendous power to achieve the affirmation. Besides, at the violet holy fire of God hours, if we conduct the violet holy fire of God training, the violet holy fire of God development happened automatically increases stamina. Actually, the surge of the increasing stamina only happens when we train the violet holy fire of God at the violet holy fire of God hours.

Where are the best places to carry out affirmations?

Affirmation can be carried out anywhere, on the streets, at public places, at homes, in the offices, in cars, virtually anywhere. Moreover, in extreme conditions, do the protection affirmation to avoid from all kinds of dangers.

CHAPTER 6

ABUNDANCE

How to increase abundance?

Abundance can be increased by doing the following:

- Purification
- Increase the fortune aura in the environment
- Avoid storing objects with a dirty/negative aura
- Avoid keeping animals with dirty/negative auras
- Explode the fortune aura at home and office
- Destroy dirty auras, evil creatures, evil spirits in homes and offices
- Protection of residences and offices from dirty auras and evil creatures, evil spirits
- Increase the fortune aura in yourself
- Positive thinking to generate positive emotions
- Forgiveness and love
- Increases strong belief in abundance.
- Fuels the belief in abundance
- Powerful creative visualization
- Practicing the fortune power of God the presence of the Lord Jesus Christ
- Drink Water full of the fortune power of God the presence of the Lord Jesus Christ
- Increase Self Value
- Holy Spirit Outpouring Prayer Meditation
- 3 main powers and highest caste love meditation
- True fortune soul meditation
- Miracle Power Booster Meditation
- Persistence in doing whatever is the goal

1. Purification of Abundant Nature

Abundance is the nature or character of the positive vibration of the universe. When the purification of the body, soul and spirit is carried out, then automatically the nature or character of abundance will arise in the self and develop depending on how high the purification is done.

The higher the level of purification carried out, the nature or character of abundance will develop and evolve into a perfect level of nature or character (divine nature = deva = buddha = tao).

The following is the order of purification that occurs in the nature/character of abundance

Abundant energy purified will evolve into abundance pure energy

Abundant pure energy is purified will evolve into abundance pure aura

The abundance pure aura is purified and will evolve into the abundance pure soul = pure nature of abundance = Abundance Deva, Abundance Buddha, Abundance Tao

The Abundance Deva, Abundance Buddha, Abundance Tao is purified to evolve into the Abundance Divine Deva, Abundance Divine Buddha, Abundance Divine Tao

The aura of the purified soul will evolve into a Deva

The purified soul will evolve into Buddha

The purified Soul Core will evolve into Tao

The evolution of the soul aura, soul and soul core into deva, buddha, tao can be seen with the third eye by seeing the growth of status fruit in the soul body. The growth of the status fruit indicates that the soul aura has evolved to reach the deva level, the soul has evolved to the buddha level, and the soul core has evolved to reach the tao level.

The status fruit of a deva is the swastika

The status fruit of the Buddha is the swastika

The status fruit of the Tao is YING YANG

The status fruit of True Spirit is the highest caste Love

The abundance soul which is the nature or character of nature that has evolved into a deva, buddha, tao automatically has its own abundant universe. The universes grow along with the growth of the status fruit in the soul.

The universe is the place where the souls live

And in that universe it contains all the powers the soul needs to build, maintain, destroy the abundance universe.

On 1 grain of abundance energy will produce 1 abundance deva, 1 abundance buddha, 1 abundance tao.

And in each one of the abundance deva, the abundance buddha, the abundance tao grows the Abundance Deva universe, the Abundance Buddha universe, the Abundance Tao universe

And if purification is carried out to an even higher level, then 1 Abundance Deva, 1 Abundance Buddha, 1 Abundance Tao will grow to evolve into:

1 Abundance Divine Deva along with the Abundance Divine Deva universe

1 Abundance Divine Buddha along with the Abundance Divine Buddha universe

1 Abundance Divine Tao along with the Abundance Divine Tao universe

1 unity multiple abundance deva along with 1 unity multiple Abundance Deva universe

1 Unity Multiple Abundance Buddha along with 1 Unity Multiple Abundance Buddha universe

1 unity of multiple abundance tao along with 1 unity of multiple Abundance Tao universe

It is conceivable how many abundant soul cultivation bodies can be born/grown in us if we do high-level cultivation.

2. Abundance System

In the abundance system there are many powers that help each other to create an abundant life.

These powers are:

- The Abundance Power
- The Fortune Power
- The Luck Power
- The Prosperity Power
- The Anti – bankrupt Power
- The power of destroying all obstacles
- The Success Power
- The Glory Power

But of all these powers, the most important, the strongest to be trained in Q-RAK Divine Cultivation is the Fortune Power.

By training to increase the Fortune Power, abundance will increase more easily.

3. Increase the fortune aura in the environment

The purpose of increasing the fortune aura in the environment is that the vibrations of the fortune aura in the environment affect the vibration of the fortune aura in the self. The vibration of a strong environmental fortune aura will make it easier for yourself to multiply the fortune aura in yourself. It is like the resonance effect of a magnet, where the same vibration will attract and strengthen each other, the opposite vibration will repel and weaken.

Here's how to increase the fortune aura in the environment

- Avoid storing objects with a dirty/negative aura
- Avoid keeping animals with dirty/negative auras
- Explode the fortune aura at home and office

By doing the following affirmation: "I intend for 5 hours to use the fortune power of God the presence of the Lord Jesus Christ to increase the fortune aura in my entire body, all my blood, all my nerves and brain, all of my consciousness, my entire house, all my working place until permanent perfect completely the highest caste and free from dirty aura attack, viciousness attack, evil spirits attack, evil creatures attack, evil powers attack, evil amulets attack and any attack that hinder, destroy the achievement of increasing the fortune aura to all sources, seeds, roots, breeders and the core of all those barriers." (repeat the affirmation 3X). Affirmations are done every 5 hours.

- Exterminate dirty aura, evil creatures, evil spirits in residence and office that block and destroy fortune, abundance, luck, prosperity, success, glory are dirty aura, evil creatures, evil spirits, evil power. So it is necessary to destroy and exterminate all the dirtiness and evil attacks.

By doing the following affirmation: "I intend for 5 full hours to use the holy cross power of God the presence of the Lord Jesus Christ to create the highest caste protection system for me from any harm, any accident, any crime, and any evil attack, any dirtiness attack until permanent perfect completely the highest caste and to detect, destroy, exterminate to the whole source, seed, root, breeder and core of all dirty aura, all viciousness, all evil spirits, all evil beings, all evil powers, all evil amulet that attack and ruin, destroy my fortune aura and purification in my entire body, all my blood, all my nerves and brain, all my consciousness, my entire house, all my working place." (repeat the affirmation 3 times). Affirmations are done every 5 hours

- Protection of residences and offices from dirty auras and evil creatures, evil spirits

By doing the two affirmations above, protection will automatically form at your residence and office.

4. Increase the fortune aura in yourself

Increasing the fortune aura in yourself is an absolute thing to do, because the biggest and strongest changes are starting from the self and then spreading outside.

Here's how to improve the fortune aura in yourself:

- Positive thinking to arouse positive emotions

Change your mindset so that only a positive mindset that you always have. What you believes then that will happen. Thinking good things so that only the good things happen to your life.

When you think positively, positive thoughts will emit a positive aura. Positive thoughts have consciousness that will attract the same quality vibration of positive aura in nature into life.

A strong mind is a mind that causes emotions, and emotions that arise will produce a new soul according to the emotional vibration.

So strong positive thoughts that cause strong positive emotions will produce a strong positive soul.

Thought about strong fortune that causes emotions about strong fortune will produce a strong fortune soul.

If the mind of a strong fortune that causes emotions about strong fortune and the strong fortune spirit is maintained at any time every day and even strengthened with the purification the self does, then the fortune soul which is produced will grow into the soul of the fortune controller (deva fortune, Buddha fortune, Tao fortune) who can realize the things of the fortune needed for life. The soul of the fortune controller that you produce from your perseverance training focus on the mind about fortune / character of fortune will change events, events in the future that you believe.

- Forgiving and love

Free yourself from all the shackles and negative bonds that arise from hatred, anger, heartache, and traumatic.

Hatred, revenge, anger and hurt, traumatic has negative vibrations that damage consciousness.

The vibration becomes a kind of shackle, a mental blockade, which binds and blocks the vibration of the consciousness to develop and widespread.

The vibration poisoning consciousness of the self and make consciousness chaos, wasting the fuel of consciousness, drain the stamina, the instability of the body's metabolic system so that the self becomes sick.

These vibrations tend to attract the same negative vibration in nature to the self so that the self begin to be filled with dirty auras, illness, bad luck aura, bankruptcy aura.

The vibration will attract negative people who have the same quality in nature and the negative events will begin to occur frequently.

By learning to forgive and give love, then the shackles, mental blockade, negative bonds produced by hatred, anger, heartache, and traumatic will be destroyed and exterminated so that the nerve system of consciousness can function normally. There will be a release, healing, and recovery of the body, soul, and spirit to the self when you forgive and love. Consciousness will get extraordinary energy from the release, healing, and recovery so that consciousness will expand and positive vibrations will begin to flow on the widespread consciousness. So God's holy blessings and abundance will easily flow to life in the self.

- Increases strong belief in abundance.

What you believe in, that's what happens.

When that belief is able to move the subconscious and super conscious, then be prepared for miracles to flow in your life.

Subconscious consciousness and super conscious awareness have the ability to attract events, people and things that the self believes in.

Subconscious awareness and super conscious awareness will automatically manifest abundance based on the beliefs you have

The more the subconscious and the super conscious awareness are strong and pure, the more powerful the self is to make the miracle of abundance.

- Fuels the belief in abundance

Give abundant fuel 24 hours a day to the abundance belief by practicing abundance affirmations, powerful creative visualizations, and purifying the abundance vibrations. With continuous abundant fuel in the belief in abundance, abundance will be easy to manifest and even tend to be miraculous.

- Powerful creative visualization

When the self performs the highest caste purification then all energy systems, consciousness systems, body systems, chakra systems will develop and evolve in such a way and cause the self to be filled with the Powers of the purification. When you are full of power, and you do creative visualization, then the visualization you do will be full of power. If you are full of God's power as a result of your divine cultivation, every creative visualization you do will be full of God's power. And Creative Visualizations that are full of God's Power will make Creative Visualizations miraculous. Anything that is visualized creatively will be easily realized in the real world.

The True Fortune Soul Meditation

The True Fortune Soul Meditation is a form of super-conscious meditation or meditation on high awareness.

This meditation focuses the mind and intention on the point between the 2 eyebrows. In many literatures it is said that the point between the 2 eyebrows is also known as the GOD SPOT.

The point between the two eyebrows is the center of vibration of the soul.

The point between the 2 eyebrows is the center point of the embodiment of the soul

If you focus on this point and meditate on the vibration of the nature or character of fortune, you will create a body of cultivation of the fortune soul.

For Q-RAK Divine Cultivation practitioners who have the highest caste purification vibration, when focusing on the point between the 2 eyebrows and meditating on the fortune soul vibration, a true fortune soul cultivation body will be produced.

The True Fortune Soul is a very strong and high level fortune cultivation body, has the power to control the fortune aura and the fortune power.

So it is very good to often do the true fortune soul meditation every day.

Here's how to do the true fortune soul meditation:

Meditation without music

Meditation can be done anywhere and anytime without using special music for the true fortune soul meditation, the trick is to simply focus your thoughts and intentions on the point of light at the point between the 2 eyebrows while repeating the affirmation of the true fortune soul meditation

Meditation can be done open eyes or closed eyes.

Meditation can be done while doing activities, working or walking.

Meditation time is about 5 minutes to 20 minutes, depending on your comfort

Meditation using special music for the true fortune soul meditation

Do meditation in a comfortable place and free from any distractions

Then sit back, and read the true fortune soul meditation affirmation

Then play special music for the true fortune soul meditation which consists of 3 songs

Listen to the music using a headset until all 3 songs are finished, the eyes can be closed or open.

Meditation can be done after even hours or after the 3 Main Powers and Highest Caste Love Meditation.

Here are the affirmations for the true fortune soul meditation

The 1st affirmation is repeated 3 times:

"I am the true fortune soul

Is a spot of light smaller than an atomic quark at the point between 2 eyebrows.

The 2nd affirmation is repeated 3 times:

"I am the true fortune soul

Having the power to control, increase, and multiply the fortune aura and the fortune power.

The Miracle Power Booster Meditation

Miracle Power Booster Meditation is a meditation system that has a function to boost all the Miracle Powers you have. This meditation is carried out at least and a maximum of once a day and it is forbidden to do it more than 1 time a day.

Why is the Miracle Power Booster Meditation needed?

When the souls are shackled by trauma, shackled by mental blocks, shackled by limiting beliefs, shackled by falsehood beliefs, when all these shackles are broken, destroyed, exterminated by something pure, bright, true, those souls will be transformed into souls that shines pure, bright and true and the soul moves to the realm of the pure, bright and true soul.

The Miracle Power Booster Meditation is like a tool to transform humans who are shackled by evil and dirtiness due to wrong beliefs and limiting into radiant humans who are God's bride.

Devil tries to ruin and destroy human efforts to live eternally with God in various ways:

- makes human consciousness fall into dirtiness and evil.
- keep people away from the divine vibrations that liberate them from the shackles of dirtiness and evil.

When you only believe that the Lord Jesus is only a prophet and not God, then you will only get that vibration. With such belief, the devil is very easy to attack yourself and destroy yourself. You will have difficulty to struggle to fight against and destroy the demons that destroy the Blessings of God's Holy Blessings for purification, holy protection, salvation, miracle healing, abundance of fortune, freedom from complicated and difficult problems, and true peace, tranquility, and happiness.

When you believe that the Lord Jesus did not die on the cross to atone for human sins, then that vibration you will get. All sins in oneself will not be atoned by the Blood of Jesus. The self that is shackled by sin and all dirtiness will be easily defeated, destroyed and controlled by the devil.

When you believe that the Holy Spirit does not come from the Lord Jesus but comes from the Father, then that vibration you get. A vibration that is not full of power, a vibration that the devil can still beat. With a vibration that is not full of power, it will make yourself easily defeated by the enemy. It will be difficult to achieve victory and glory. You will be easily defeated and destroyed. Whereas the Father, the Holy Spirit, the Son are the same Lord Jesus but are in different dimensions.

The powerful vibration is when you believe that Jesus Christ is the Lord the Creator of the Universe including everything in it, and has power over it. The Lord Jesus Christ is God the Father-God the Holy Spirit-God the Son, is the 1 God but consists of 3 personals namely the Father (Lord Jesus Christ in the God dimension), the Holy Spirit (Lord Jesus Christ in the spiritual dimension/ Spirit of the Lord Jesus), Son (Lord Jesus Christ in the physical dimension/ God incarnated into man).

The Lord Jesus Christ died on the cross to atone for the sins of mankind and so that mankind deserves to receive the outpouring of the Holy Spirit. Powerful vibrations are vibrations produced by your true belief in the Lord God Jesus Christ. That's why the miracle power booster meditation contains a very detailed statement of faith belief about the Lord Jesus Christ, is to restore the vibration of true belief that is full of power to defeat the dirtiness, evil, deception carried out by the devil. So that with the right belief in the Lord Jesus Christ, it will be easy for oneself to achieve the spiritual transformation of the highest caste to

become the bride of Christ. You will easily get all the Power and Grace given by the Lord Jesus Christ for all missions of salvation and for the Glory of the Lord Jesus Christ.

Benefits of the Miracle Power Booster Meditation:

How to use the Third Eye and Conscience

During Q-RAK Divine Cultivation attunement, the ability of the third eye and conscience in Q-RAK practitioners is opened and awakened to a perfect level by Q-RAK Master. So after the Q-RAK divine cultivation attunement is given, practitioners are able to use the abilities of the third eye and conscience.

The Third Eye and Conscience are spiritual abilities that function in a relaxed state. The brain must be on alpha, theta or delta brain waves.

When the brain is in alpha, theta or delta brain waves, the ability of the third eye and conscience will be activated automatically.

When the ability of the third eye and conscience is active, the self will be able to see things as follows:

- See through organs like x-ray
- See auras, chakras, energy pathways in the body
- View energy grains
- See cultivation bodies
- See the spiritual realm
- Communicate telepathically
- Etc.

When you intend to see auras, you will see images of auras in your mind like people dreaming or fantasizing, not really real, only visible in your mind. So that practitioners are often unsure of what their third eye sees, thinking that the image in the third eye is only their own mind. That's what makes practitioners often doubt whether the third eye's ability is working or it's just a thought.

So that the third eye vision is clearer, then more relaxed and avoid thinking, just intend to feel what you want to see, wait a few minutes, then an image will appear in your mind of what you want to see spiritually.

When the mind is tense, the brain is in beta brain waves, the ability of the third eye and conscience will decrease so that often you cannot see any images in your mind. Or just vaguely visible.

How to train the third eye ability:

- Face your palms each other at a distance of 10 cm
- Intend both palms to flow the fortune power of God the presence of the Lord Jesus Christ

- Close your eyes, relax like people want who to sleep, or alpha or theta brain wave conditions
- Intend to feel the colors of light and the forms of the fortune power of God the presence of the Lord Jesus Christ flowing from the palms.
- Wait for 3 to 5 minutes and stay relaxed
- In the mind, images of colors and shapes will appear from the fortune power of God the presence of the Lord Jesus Christ
- The more relaxed the picture in the mind will be clearer and more real
- If you tense up and try to think, your brain will automatically be in beta brain waves, and the image in your mind will become blurry or disappear altogether.

Frequent practice of these techniques will improve the ability of the third eye and conscience.

Frequent re-attunement of Q-RAK Divine Cultivation will improve the ability of the third eye and conscience.

CHAPTER 9

- And many other benefits.

The violet holy fire of god is the Holy Fire Power needed for the evolution of one's Body-Soul-Spirit into a Human of the Highest Caste. Highest Caste Humans are Avatar Humans, God Humans, Buddha Humans, Holy Humans.

When the soul is purified by the violet holy fire of god, it will evolve into a God, Buddha, or Tao, depending on which part of the soul is purified. Example:

The aura of the purified fortune soul will evolve into a fortune god. Meanwhile, if the fortune soul is purified, it will evolve into Fortune Buddha. Meanwhile, if the core of the Fortune soul is purified, it will evolve into the Fortune Tao.

The level of that spiritual evolution is determined based on the growth of the status fruit on the divine body that grew as a result of purification by the violet holy fire of god.

From 1 soul of fortune, it can evolve into 3 gods, namely God, Buddha and Tao. What if we have a lot of positive souls.

Examples of positive souls are:

- Fortune soul
- Lucky soul
- Soul of safety
- Prosperity soul
- The anti – bankrupt soul
- Success soul
- Wealth soul
- Wisdom soul
- Soul of knowledge
- Patient soul
- Justice soul
- Courage soul
- Soul of responsibility
- and much more.

The soul is the same as human nature or character.

The soul or nature or character has its own personality, has its own power, for example;

The Fortune Soul comes from a strong aura field until it grows and continues to have a strong awareness of fortune, has the power to attract fortune, has the power to collect fortune.

By thinking continuously on the character of fortune, on matters related to fortune, on the fortune aura, our consciousness, our brain has vibrated in the fortune aura. The frequency of consciousness in the brain that continuously emits the character of fortune, the fortune aura, things related to fortune, the frequency of consciousness will create a strong field of fortune aura. This Fortune Aura Field will automatically attract the fortune aura in nature of the same quality.

Attracting like-minded people is like deja vu, bringing about events related to fortune. That's because the fortune aura field must have its own awareness, its own personality or you could say the fortune aura field has evolved into the nature of fortune, the soul of fortune in the self.

So grow the fortune soul and develop the fortune soul until it reaches the stage of controlling the fortune aura or the stage of the fortune deva - fortune buddha – fortune tao.

How many of our positive souls can evolve into Deva, Buddha, Tao?

The number is unlimited because each human being has unlimited nature, character, soul.

When the souls have evolved into deva, buddha, tao, it can be seen from the third eye or spiritual eye that these souls are in the form of deva, buddha, tao, in the form of golden bodies or crystal bodies and some have wings and some have many arms and the body have a face of the self because it is the self.

Imagine, as an ordinary person, you know and realize that you feel that you only exist 1, but when your third eye is opened, when you can see the spiritual world of higher dimensions, when the souls you have reached the level of deva, buddha level, level Tao, a certain level of holiness, you will be surprised because you see yourself filled with angels, deva, buddha, tao who are bright, winged, and have many hands, all of which have your own face. How complex is Spiritual and it's amazing to be at such a high level.

What about the Spirit of the Self?

If the soul is a trait, a character, which is formed by habit, due to the focus of the mind being trained, because of an amplified aura then the soul can be grown to infinity. But the Spirit of the self is only one, namely the soul itself.

So the spirit is your life itself.

Spirit exists in its dimension, namely the Spirit dimension. When the purified Spirit will evolve into an Avatar, the Avatar will evolve into a Divine Avatar, the Divine Avatar will evolve into a True Higher Self, the True Higher Self will evolve into a True Spirit. The True Spirit will evolve until it unites with God the Creator.

The soul has its own consciousness and personality as well as the Spirit has its own consciousness and personality. That's the complexity of humans created in the Image of God.

So by understanding the complexity of the body - soul - spirit in humans, we will be helped to understand the concept of a Triune God, namely God the Father - God the Son - God the Holy Spirit.

God the Father is Lord Jesus in the Divine Dimension

God the Holy Spirit is the Lord Jesus in the Spirit Dimension (The Spirit of the Lord Jesus)

God the Son is Lord Jesus in the Physical Dimension

Our body is temple of God, is house for the Holy Spirit (the Spirit of the Lord Jesus) which the Lord Jesus poured out on believers in the baptism of the Holy Spirit.

That is the mission of the crucifixion of the Lord Jesus to atone for human sins so that humans deserve the outpouring of the Holy Spirit (the Spirit of the Lord Jesus himself) to guide humans to the path of God's salvation and live in the Kingdom of God.

A pure body is the ideal home for the Holy Spirit

A pure body will facilitate the fullness of the Holy Spirit

A pure body will be full of the power of the Holy Spirit

The violet holy fire of god purifies the body - soul - spirit in the self, making the body - soul - spirit pure and holy.

When the body - the soul - the spirit becomes pure and holy, and when the self has received the Holy Spirit and the Holy Spirit lives in a holy body. It is seen spiritually / third eye as Lord Jesus dwells in the self and is filled with deva, buddha, tao, avatars, holy angels who are the self like God and armies of angels and saints preparing to do miracles and destroy all evil on earth.

The violet holy fire of god is the Fire of Life to purify the self, to sanctify the self.

In the past when the old era was called Kundalini, but in 2016 the center of the kundalini universe on Earth, precisely on the island of Bali has been destroyed by evil and it is a sign that kundalini has ended, the old era will soon be over and replaced by a new era. The new age - the new world is the blue age.

The blue color of the highest caste is violet, so when the aura everywhere in all corners of the earth has changed to violet, it is a sign that the vibrations of the new world are getting more real and mature.

The vibrations of the blue age are getting more real and mature, so get ready to welcome the blue age. The arrival of the blue age will begin with catastrophic disasters of natural selection, earthquakes, volcanic eruptions, tsunamis, floods, tornadoes, landslides occurring simultaneously in all over the earth, a period of great tribulation occurs on earth.

For that, prepare yourself, purify yourself, awaken and cultivate the violet holy fire of god in yourself.

In the blue age, the fire of life had turned into the violet holy fire of god.

The violet holy fire of god is the Fire that sustains the blue Age - the New World.

The violet holy fire of god that is blazing will automatically form a protective fire over the entire body and the body's auric field from all harm and evil.

Here's how to awaken and cultivate God's Violet Holy Fire in yourself:

- Do the Holy Spirit Outpouring Prayer for 30 minute for new practitioners, which can be done at any time in a convenient place.

- Do the 3 Main Powers and the Highest Caste Love Meditation at even hours according to city for 25 minutes

Example:

Ultimate best hours

06.00 - 06.25

12.00 - 12.25

18.00 - 18.25

24.00 - 00.25

Second best hour

08.00 - 08.25

10.00 -10.25

14.00 -14.25

16.00 -16.25

20.00 -20.25

22.00 - 22.25

During these hours the spiritual dimension of the violet holy fire of god in the Realm opens which causes the growth and development of let holy fire of god in the self there will be an explosion of development if cultivating it at that time.

2. The Fortune Power of God the Presence of the Lord Jesus Christ

The fortune power of God the presence of the Lord Jesus Christ is the Fortune Power that flows from the Presence of the Lord Jesus Christ to you.

The fortune power of God the presence of the Lord Jesus Christ is different from the power of ordinary fortune or the true fortune power from the result of purification cultivation.

Fortune aura is an aura that radiates from the character of fortune or trait

The fortune power is the power that controls multiplication, increasing the character of fortune

The true fortune power is the power that results from the purification of the highest caste of the fortune power.

From the purification of the highest caste the fortune power will be generated:

- True Fortune Power

- The Multi True Fortune Soul consisting of true fortune deva, true fortune buddha, true fortune tao.

- Multi True Fortune Soul Universe consisting of true fortune deva universe, true fortune buddha universe, true fortune tao universe.

- The opening of the divine chakras of the highest caste of fortune characters. The power of True Fortune comes from the highest caste divine chakras which are opened due to the highest caste purification from the fortune power.

Meanwhile, from the results of the Outpouring of the Holy Spirit and the highest caste purification in the self, it will produce the Powers of God that flow from the Presence of the Lord Jesus Christ. One of the flowing powers is the fortune power of God the presence of the Lord Jesus Christ.

So someone who has received the initiation of Q-RAK Divine Cultivation and has become a Q-RAK Divine Cultivation practitioner has been able to access and channel the powers of:

- True Fortune Power
- The fortune power of God the presence of the Lord Jesus Christ
- True Fortune Soul cultivation body

3. The Holy Cross Power of God the Presence of the Lord Jesus Christ

The holy cross power of God the presence of the Lord Jesus Christ is the Power of the Holy Cross that flows from the Presence of the Lord Jesus Christ in you.

The holy cross power of God the presence of the Lord Jesus Christ is a very powerful power to destroy and exterminate evil and demons.

The Lord Jesus Christ died on the cross to atone for the sins of mankind, so that humans deserve to receive the Outpouring of the Holy Spirit by the Lord Jesus Christ. So the holy cross power of God the presence of the Lord Jesus Christ contains the following powers:

Contains the Power of the Holy Blood of the Lord Jesus Christ which flowed at the crucifixion to purify, atone for sins, destroy evil, heal sicknesses, and provide holy protection.

The mighty and miraculous power to destroy and defeat the devil and any evil.

CHAPTER 10

ENERGY SYSTEMS

Energy System

There are 3 energy systems in nature, those are:

1. Natural energy system
2. Cultivation energy system
3. Divine cultivation energy system

Natural Energy System

Natural energy is also called as the energy of universe. Some call it chi or prana, which means the resource of life or bio-energy. Natural energy can be found everywhere in the universe, on inanimate objects as well as living things.

In humans, the natural energy is usually found through a touch of palms, so that the touch of palms is usually used for healing therapy.

Animals and plants may also become the source of natural energy.

Colors, sounds, aromas, air, sun rays, earth, planets and also any inanimate objects.

Crystal stone is one example of the strong natural energy resources.

From the characteristic, natural energy can be classified in two types:

1. Positive natural energy or pure natural energy
2. Negative natural energy or impure natural energy

Based on its origin, natural energy can be distinguished as follows:

- Natural energy of objects, plants, animals, humans, planets, galaxies, universe
- Natural energy of the etheric body layer in the base chakra, sex chakra, navel chakra, heart chakra, throat chakra, ajna chakra, crown chakra, divine chakra

The natural energy of the etheric body layer in the base chakra, sex chakra, navel chakra, heart chakra, throat chakra, ajna chakra, crown chakra is commonly called ordinary prana, while the natural energy of the etheric body layer in the crown and divine chakras is often called divine prana. Divine Prana is not a cultivation energy and is still a natural energy.

Cultivation energy system

Cultivation energy is also called evolution energy. Cultivation energy is derived from the natural energy, which has been evolved, so that it cannot be found in the universe freely. Cultivation energy is only obtained from the process of natural energy evolution and only human or creature who do the evolution of the natural energy can obtain the cultivation energy.

Based on its characteristic, cultivation energy can be grouped into two types:

1. Negative cultivation energy/impure energy

Negative cultivation energy or impure energy is also called witchcraft. This types of energy is totally negative and has the characteristic of harming the spiritual evolution on humans. Thus, it would be better to avoid any witchcraft cultivation.

2. Positive cultivation energy/purification energy

Positive cultivation energy or purification energy is also called divine power. This type of energy has the characteristic of purifying and it is useful for humans' spiritual evolution.

Divine Cultivation Energy System

The Divine Cultivation energy system is a combination of several Spirit Cultivation systems, Soul Cultivation and Divine Powers of the Holy Spirit which form a very complex Cultivation system that produces new powerful, miraculous Powers.

The almighty energy used to purify the physical body, soul body, spirit body in the Q-RAK Divine Cultivation technique consists of many high-level almighty energies.

This high-level almighty energy comes from the combination of many Spirit cultivation systems, and Soul Cultivation and Divine Powers flowing into the Q-RAK Divine Cultivation system. Here is a collection of these powerful energies, namely:

- The holy Cross Cultivation
- Bravana Cultivation
- Trahasta Cultivation
- The Anointing power of God
- The power of the flow of miraculous healing
- The Hand of God power
- The Powers of the Holy Spirit

- Other Divine Powers

The effects of spiritual energy on human life

Spiritual energy is needed to ensure the life of all livings on earth, whether plants, animals or humans. All body systems in living things digest the spiritual energies as the sources of energy for their life. Without spiritual energy, all living things will perish and will not be able to live. Spiritual energies influence body systems and awareness systems in living things. The existence of spiritual energy based on its nature will influence all living things, mostly to humans. Spiritual energy has many levels based on its dimensions.

The higher the level of spiritual energy, the greater its ability to change, control body systems in humans and other living beings.

The effects of spiritual energies on humans are:

1. Negative energy

The History of Q-RAK and Its Development

The Q-RAK Divine Cultivation was created by Grand Master Rony Irianto himself through a very long spiritual practice. The mission of the Q-RAK Divine Cultivation is to protect the earth from being destroyed due to the dirtiness caused by the dirty aura and viciousness on the earth and mankind. As a science that teaches spiritual evolution, the Q-RAK Divine Cultivation has also experienced a very extraordinary cultivation system evolution, it can even be called a spiritual revolution because the evolution that occurs is very, very fast. The spiritual cultivation system has no limit to evolve as long as it is still in the destiny that has been outlined by God, so the Q-RAK Divine Cultivation also undergoes unlimited energy evolution, every time there is an evolution of energy to become purer, higher, more powerful and more miraculous. This is the reason why the cultivation of Q-RAK from time to time since it was first created until now has undergone many system changes.

The following is the evolution of the Q-RAK Divine Cultivation system based on its history and development.

Stage 1 evolution (Q-RAK reiki)

At first, Q-RAK cultivation was published to the public in Indonesia on September 25, 2007 as the Q-RAK reiki energy system. In this energy system, it uses ordinary universal energy or natural energy at the Quark energy level.

The benefit of Reiki Q-RAK is to cure illness by using natural/universe energy at the Quark energy level. Because it uses natural energy, the ability of Q-RAK reiki is very limited and it is difficult to overcome illness due to attacks by dirty aura and viciousness from the self and from the environment.

Stage 2 evolution (Q-RAK cultivation)

In early 2009, I evolved the Q-RAK reiki energy into a Q-RAK cultivation system. The purpose of the Q-RAK cultivation system is to provide a high level of purification to Q-RAK cultivation practitioners. If the practitioner is filled with dirtiness, dirty aura, viciousness, negative karma, curses, and is bound by the dark power of the devil then it is difficult for the practitioner to heal himself from illness, poverty, disharmony, misfortune, accident, disaster, bankruptcy, destruction, ignorance, and others. Self-purification will cause the self to be positive and positive auras and all the goodness of God will accompany the self, easy to heal illness, become abundant, success, career increases, harmonious relationships, intelligent, creative, calm, peaceful, happy, and so on.

On Q-RAK cultivation, began to practice cultivation techniques, namely:

- Spirit Cultivation (Avatar, True High Person, True Spirit)
- Soul Cultivation (Deva, Buddha, Tao)
- The Bravana Power
- The Trahasta Power

Stage 3 evolution (Q-RAK Divine Cultivation 2022)

At this stage, all high-level cultivation in Q-RAK Cultivation is combined with God's Powers from the Presence of the Lord Jesus Christ, namely by practicing the following new techniques:

- The Holy Spirit outpouring Prayer meditation
- The 3 Main Powers and the Highest Caste Love Meditation
- True Fortune Soul Meditation
- Miracle Power Booster Meditation
- The Power of the BRAVANA of the Presence of the Lord Jesus Christ
- The Power of the TRAHASTA of the Presence of the Lord Jesus Christ
- The Power of the Hand of God of the Presence of the Lord Jesus Christ

- The Anointing power of the Presence of the Lord Jesus Christ

- The Power of the flow of miraculous healing of God the Presence of the Lord Jesus Christ

Combining these high-level cultivations with the Powers of the Presence of the Lord Jesus Christ is a very miraculous technique for everything that is needed in living this life.

CHAPTER 11

CHAKRA

Chakra is the spiritual system of humans, which can help improving the purification of consciousness and adequate knowledge, so that it can lead one's life to a better direction. The development of chakra of the body will make one absorb and comprehend the knowledge of everything learned. Chakras are parts of the body of energy, which has the form of transparent lotus, become the entrances and exits for energies of the body as well as the control center of humans' energy and consciousness. If someone dies, his or her chakras will be destroyed and no more energy left in his or her lifeless bodies. Chakra is formed from the joining of energy nadi and they are the center of the meeting of energy nadi or the center of the meeting of the nerve of consciousness.

Energy nadi are energy nerves in the energy body. Nadi connecting one chakra to other chakras. In our body, there are two main arteries, namely ida pingala and shushumna band as the main of nerve line.

Can chakras be damaged?

Chakras can be damaged and it is caused by negative deeds conducted by humans, error consciousness or crimes and due to an alliance with devils and also the negative aura itself. The sign of damaging chakras is the petal of the lotus cracks even falls to pieces. We can say as a leak of chakra.

The impacts of damaged chakras are the decreasing level of self-purification. If the chakras are always damaged without any efforts to fix them, one will be harder in conducting self-purification. Fixing the damaged chakras can be done by purifying the chakras. The pure of oneself can also improve the stability and development of chakras owned. Good development of violet holy fire of God automatically means good development of chakras. Thus, violet holy fire of God is the basic foundation of everything. The development of chakras actually is one of the foundations of self-control. However, human's consciousness absolutely determines self-control.

In human's body, there are 7 major chakras and hundreds of minor chakras.

The seven major chakras are:

1. Root chakra
2. Sex chakra
3. Solar plexus chakra
4. Heart chakra
5. Throat chakra
6. Ajna/ third eye chakra
7. Crown chakra

The functions of the chakras are:

1. As the center of energy's entrances and exits on the body
2. As the base or foundation of purification and ownership of spiritual power or spiritual energy itself
3. As the control center of consciousness
4. Affecting and controlling body metabolism
5. Controlling and affecting nerve system
6. Controlling and affecting gland system
7. Controlling and affecting the body's aura. Aura is energies on the body which are crystalized or solidified. Besides 7 major chakras and hundreds of minor chakras in the body, humans also have divine chakra.

Root Chakra

Root chakra is located at the base of spine in tailbone or coccyx area, its form is like a transparent lotus with red as the dominant color, the lotus has 4 petals that represent the number of energy nadi that meet in the root chakra, in the number of 4 energy nadi. Root chakra is included in the earth element.

The functions of root chakra:

- Affecting life and the self's survival
- The foundation of the development of the chakras in humans.

Sex Chakra

Sex Chakra is located at the genital area, its form is like a transparent lotus with orange as the dominant color. The lotus has 6 petals that represent the number of energy nadi that meet in the sex chakra, in the number of 6 energy nadi. Sex chakra is included in the water element.

The functions of sex chakra:

- As the center of low level and physical creative energy.
- Affecting sex organs
- Correlating with desires or the control of desires

Solar Plexus Chakra

Solar Plexus Chakra is located at the navel, its form is like a transparent lotus with yellow as the dominant color. The lotus has 10 petals that represent the number of energy nadi that meet in solar plexus chakra, in the number of 10 energy nadi. Solar plexus chakra is included in the fire element.

The functions of solar plexus chakra:

- Controlling food digestion
- As the center of emotions

Heart Chakra

Heart chakra is located in center of the chest, its form is like a transparent lotus with green and pink as the dominant colors, the lotus has 12 petals that represent the number of energy nadi that meet in the heart chakra, namely 12 energy nadi. Heart chakra is included in the air element.

The functions of heart chakra:

- Controlling blood circulation system
- Affecting heart, lungs and thymus gland
- As the center of love and affection
- The direction of feeling or attachment on anything

Throat Chakra

Throat chakra is located in the base of the throat, its form is like a transparent lotus with blue as the dominant color. The lotus has 16 petals that represent the number of energy nadi that meet in the throat chakra, in the number of 16 energy nadi. Throat chakra is included in the sky element.

The functions of throat chakra:

- Affecting throat and thyroid gland
- Affecting lymph nodes
- As the center of communication/ control over relationships with others
- correlating with anything cause or done by a man himself

Ajna Chakra

Ajna Chakra also called third eye chakra is located in the central point between two eyebrows, its form is like a transparent lotus with purple as the dominant color, the lotus has 2 petals that represent the number of energy nadi that meet in ajna chakra, in the number of 2 energy nadi. Ajna chakra is included in the thought element.

The functions of ajna chakra:

- controlling endocrine system
- controlling all major chakras
- as the center of cosmic awareness
- helping the levels of sanctity and also helping the improvement of consciousness

Crown Chakra

Crown chakra also called core chakra is located at the crown or the top of the head, its form is like a transparent lotus with white and gold as the dominant colors. Crown chakra has 1,000 petals that represent the number of energy nadi that meet in the crown chakra, in the number of 1,000 energy nadi. The crown chakra is included in the divinity element.

The functions of crown chakra:

- Affecting the brain and pineal gland
- As the center of divine consciousness
- Directly connecting with all chakras
- The perfection of everything, that is helping oneself to be free from all attachments and shackles of secularity and also helping of the purification itself. However, the chakras are merely tools because humans have freewill. Thus, the chakras are not the absolute things in helping humans to achieve the whole purification point. The best things to do are always develop chakras we have and always put the knowledge as the basic of all behaviour and always believes in the omnipotence of God to highest level, that is the main core of purification itself.

Divine Chakra

Divine chakra is unlimited in terms of number. Divine Chakra is located above the crown chakra and its existence symbolizes the existence of divine dimensions in the humans' spirits. The function of Divine Chakra is as the center of consciousness and the center of divine dimensions in the humans' spirit. Divine Chakra will open and develop simultaneously with the development of violet holy fire of god and spirit purification when the spirit has achieved the perfection of the top of crown chakra purification and the

spirit which has evolved to become avatar. Developing Divine Chakra without undergoing the stage of developing perfect violet holy fire of god down to the core of violet holy fire of god, which can go through the core chakra or crown chakra, will causing dangerous impacts like consciousness imbalance which can trigger error within oneself. After the core chakra or the crown chakra can be passed by the core of violet holy fire of god and one always practices developing violet holy fire of god, the energy from violet holy fire of god will automatically be able to help releasing the shackles of negative energy in the body. If the stage takes place maximally and continuously, automatically the highest consciousness within the humans will be getting more sacred. In this condition, the vibration of every positive thing spiritually and even the vibration of divinity can be sensed in equally perfect intensity. At the same time, Divine Chakra is opened, developed and purified completely up to the final stage. And that is the final stage of self-purification. We can say that chakra and violet holy fire of god as the basic of spiritual purification.

Consciousness Chakra

Consciousness chakra is located in the central point of the brain, it always opens and develops into the flower of consciousness chakra. The flower of consciousness chakra is blue and its form is like a lotus. The best and perfect flower of consciousness chakra is the one with diameter equal to the size of adult hand grip. Solar plexus chakra becomes the foundation of the core of consciousness chakra. The strong and solid foundation will make the core of consciousness chakra in the brain will always develop perfectly as well.

The flower of consciousness chakra has the function of helping someone to be aware. However, the chakra is not absolute since one's consciousness to do self-control is a must.

The way of using the flower of consciousness chakra is when the flower of consciousness chakra has developed, it functions automatically and no need to intend it in applying. The complete self-control is the key in using the flower of consciousness chakra. This kind of chakra is needed to achieve the perfect meditation because it helps oneself to achieve the super consciousness.

What is consciousness?

Consciousness is the condition of someone to sort which is good and which is bad by using the complete knowledge, those are the earthly knowledge and spiritual knowledge. This is the perfect wisdom.

In the condition of super conscious, one can feel the existence of the dimensions desired, in example when he/she wants to be in the etheric dimension, then he/she can feel the existence of such dimension. Thus, the consciousness is called the etheric consciousness.

What is meant by the state of super conscious?

It is the condition of when for the first time we find about the truth and the counterparts, without any disturbance of secularity bound.
